WHAT IS THE QUICK RESPONSE TEAM?

The **Quick Response Team (QRT)** is part of the Louisville Metro Department of Public Health and Wellness. Our goal is to connect with community members who have experienced an overdose to assist them and their loved ones. We are a peer led team who have lived experience and know firsthand the struggles that come with substance use disorder. We engage in compassionate conversations, build meaningful connections and provide life-saving tools and education.

OUR MISSION

The Quick Response Team follows up with people who have experienced an opioid overdose within 72 hours at their place of residence. We provide the following assistance:

- Referrals to treatment and/or mental health services for anyone who is ready
- The overdose reversal medication, naxolone
- Safer injection supplies and connection to Harm Reduction Outreach Services
- Fentanyl test strips
- Other harm reduction supplies
- Connection to community resources

We work to reduce stigma about substance use by providing education and information.

OTHER SERVICES WE OFFER

- Community Narcan trainings
- Discussions and presentations on substance use disorder
- Public awareness of trends in overdoses
- Overdose prevention education

WE ARE DEDICATED TO CONFIDENTIALITY

Protecting the information of someone who has experienced an overdose is among our highest priorities. Information shared with the Quick Response Team is private and protected.
